

Cadence Living is excited that the FDA has approved the Pfizer COVID-19 vaccine and that per each state immunization plan, **Our Residents and Team Members** are scheduled to be within this **FIRST group of recipients to receive the vaccine**. Cadence is working with local health agencies and participating pharmacies on the timing and location of the administration of the vaccine for our residents and team members. We currently expect that our residents will receive the vaccine at our community sometime in January 2021. We will keep you apprised as we learn more.

We are strongly encouraging all residents and team members to receive the vaccine. In doing so, we can reduce the risk of COVID-19 infection to the community and we can begin making strides to a return to a vibrant, engaging environment of interaction within the community between family members and residents.

In the interim we will continue our existing policies and procedures to protect our residents and team members through the holidays and beyond. Please contact your community's Executive Director for a reminder of the current precautions in place. We have also attached a Frequently Asked Questions from the CDC for your convenience on the safety of the vaccine.
